

Environmental and Sustainability Policy

TWM Traffic Control Systems Limited is committed to leading the industry in minimising the impact of its activities on the environment. We are committed to sustainable development (meeting the needs of the present without compromising the ability of future generations to meet their own needs). Concern for the environment is an integral and fundamental part of this commitment. Our aim is to reduce the impact on the environment from our operations.

The key points of our strategy and policy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible to reduce our environmental footprint.
- Minimise toxic emissions through the selection and use of our fleet and the source of its power requirement.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Promote cost savings by utilising environmentally friendly working practices and purchases
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Company.
- Promote programs to offset the Co2 greenhouse gas emissions generated by our activities.
- Identify and provide training and information to staff, customers and contractors to encourage them to develop new ideas and initiatives.
- Provide appropriate resources to meet the commitments of this policy.
